World's Smallest and Slimmest Waterproof Digital Still Camera*

Waterproof, Shock proof and Dust proof! The sleek and stylish DSCTX5 offers a large 3inch LCD touch screen to easily take and review photos. An advanced Exmor R CMOS Sensor provides stunning low-light images and sweeping panoramic views with iSweep Panorama mode. Plus, enjoy 720p HD video recording and playback.

Enjoy the outdoors without the worry

The DSCTX5 is as rugged as it is stylish. Offering waterproof functionality and able to operate up to 3 metres under water giving you peace of mind when enjoying the beach or poolside. DSCTX5 is also Shockproof giving you the added protection of being able to handle those rough adventure situations.

Low Light Picture Perfection

Sometimes a flash can wash out the scene, making it hard to capture the mood of the moment. For low-light environments, the back-illuminated "Exmor R" CMOS sensor delivers stunning performance and increases sensitivity by 2x to reduce noise.

Ultra-wide, 243-degree Panoramic Shots

iSweep Panorama Mode enables you to seamlessly capture motion and movement in panoramic shots. Just press the shutter and shoot the scene with a sweeping motion. The camera does the rest.

Carl Zeiss Lens with 4X Zoom, 25mm Wide Angle

Zoom in on the fun with a **4x optical zoom lens** sporting a **25mm equivalent wide angle**. It brings distant subjects closer for great outdoor, sports and travel photos.

Takes 10 Photos in 1 Second

Capture decisive moments—like the ball hitting the bat—with the ability to shoot 10 images in one second at full 10.2 megapixel resolution. This feature is ideal for capturing a unique sequence of images.

Shoot Movies in HD

Nothing recreates the moment like razor-sharp, high definition video. Your movies will look stunning on YouTube™ and similar sites thanks to the **720p high-definition MPEG4 recording format**.
